

Advances in Salmonid Genetics: Special Issue for Coastwide Salmonid Genetics 2023!

Evolutionary Applications

Open Access

- Aiming for contributions from Coastwide presentations
- To be published as peer-reviewed articles in *Evolutionary Applications*
- Topics from a wide range of genetics/genomic applications in fisheries (e.g., mixed stock analyses; parentage based tagging; phylogenomics; genome assemblies; adaptive variation from whole genomes/genome-wide; metabarcoding & eDNA applications; novel methods)
- Submit *titles* intended for special issue by April 30, 2023
- *Manuscripts* will be due July 30, 2023 (one month following Coastwide meeting in Boise, Idaho)
- Editors for the special issue include: Shawn Narum (CRITFC/U. Idaho), Kathleen O'Malley (Oregon State U.), Matt Campbell & Katharine Coykendall (Idaho Fish&Game), Mariah Meek (Michigan State U.), and Maren Wellenreuther (U. Auckland).
- Send questions to nars@critfc.org or other editors
